Cut out the ruler above and hold it around your ring finger, then find the corresponding letter in the circles above. Repeat 3 times to ensure an accurate reading.
Please note, you should be able to see the dotted line just inside the rim of your ring

DON'T HAVE A PRINTER?
If you do not have a printer and are using an existing ring to measure against the circles on your computer screen, use the zoom feature to ensure the ruler is true to size.
